Why should you hire Vertice?

ASK THIS INSTEAD —

It was never how do we work Vertice into the job, and how do we pay for it?

It's how can you afford not to?

The cab is rarely your biggest line item — but it routinely sets the stage for delays, headaches trying to get through submittals and scheduling, and to your client, is the single most important judgment of your project.

What Vertice does for you — start to finish

1 · CAB SELECTION & PROCUREMENT

- **Selection process** — design-build or architectural assist
- **Weight verification** against rated load
- **Budget estimate** confirmation
- **Lead-time** verification
- **Code compliance** — ASME A17.1
- **Specification** development
- **Bidding & bid leveling**
- **Submittal process**

2 · PROJECT MANAGEMENT

- **Automated backward clock** to your required delivery date
- **67-milestone** tracking process
- **Full weekly** documentation
- **Vendor & site** visitation
- **Technical & engineering** resolution for the cab vendor
- **Punchlist** process

3 · REPAIRS

- **Repair evaluation**
- **Estimating**
- **Procurement**
- **Management** services

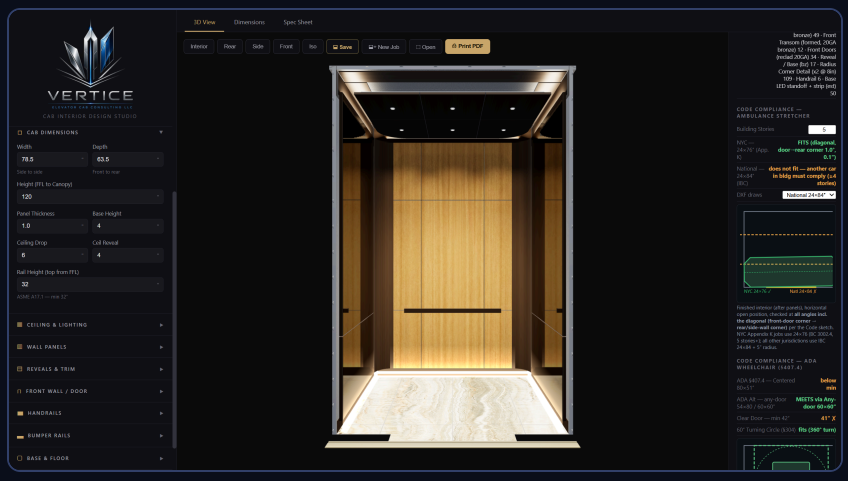

NOW INCLUDED

Fixture selection & submittals — handled

You send the specifications. Vertice does the rest, with decades of fixture experience behind it:

- ✓ **Monitor Controls fixture selections process** — included
- ✓ **Fixture submittal services** — included

See it. Check it. Sign it off.

Photoreal cab renderings with live code-compliance checks — built in Vertice's Cab Interior Design Studio.

Can you afford the cab being the reason a good job runs late?

Vertice is an independent, manufacturer-neutral elevator cab consultancy — design, specification, weight and code validation, photoreal visualization, and cab project management. 30+ years in the cab industry, no fabrication agenda.
